

Quality Policy Statement of Vasútlabor Kft.

Vasútlabor Kft. is an independent, independent legal entity. The main activities of the laboratory are soil, concrete, mineral and aggregate testing, on-site and laboratory testing of earthworks and track layers and their materials. The laboratory activities are carried out with impartiality.

We are committed to achieving continuous improvement in both our testing activities and the operation of our management system by establishing and consistently implementing a strict process control to help us fully meet our Customers' needs.

To achieve these objectives:

- Our laboratory has developed, implemented and operates its management system according to the requirements of MSZ EN ISO/IEC 17025:2018.
- Beyond the expectations of Customers, the management of the laboratory takes commitment and responsibility to meet the requirements of the standard.
- We are committed to ensuring good testing laboratory practice to provide the highest level of service to our Customers in every case.
- The tests and measurements are carried out with the accuracy and reliability required by law, standards and regulations, in accordance with the Customer's requirements and within the agreed deadlines.
- Laboratory is independent, free from external and internal influences in the tests it carries out.
- The staff of the Laboratory shall be impartial and free from all internal and external pressures, commercial and financial, and from any circumstances which might adversely affect their technical judgement, the quality of their work, the objective reporting of results.
- The Laboratory shall not engage in any activity that compromises confidence in the independence and integrity of its judgements.
- Compensation of staff is not dependent on the test results they provide.
- In all cases, the organisation shall carry out its activities independently of the subject matter of the activity and the economic operator concerned, impartially and free from any influence.
- The laboratory will treat as confidential any business, financial, technical, personal and other information that comes to its attention.
- To continuously improve the efficiency and quality of our activities, we take great care to train our staff, improve their personal skills and improve our investigation processes.
- We identify, record and assess the risks associated with our operations and seek to mitigate or eliminate them in a planned way.
- We ensure the maintenance of a clean and tidy work area, the creation of appropriate working conditions, the equipment necessary for carrying out tests and measurements and its continuous improvement.

Vecsés, 25.07.2023.
